

Electronics Recycler CEAR Honored with California Legislature Resolution

May 10, 2022

CEAR, a comprehensive electronic asset disposal provider, was presented with the Joint Members Resolution of the California Legislature upon attaining 22 years of service. The Resolution, which was sponsored by Senator Jim Nielsen and Assemblyman Vince Fong, recognizes CEAR's "Contributions to economic, societal, and environmental well-being in the State of California" and specially commends the leadership of President and CEO Paul Gao.

"We are very honored to receive this recognition and will continue our mission towards a more sustainable future," said Paul Gao. "CEAR will be part of the ecosystem building a new supply chain for renewable and recyclable materials."

CEAR's commitment to this mission has resulted in the responsible recycling and material recovery of over 270 million pounds of electronic equipment through 22 years of operation. Adapting to the fast pace of change in the electronics industry has been a challenge, but CEAR has maintained success by staying anchored to environmental stewardship and leading the search for new solutions that enable a circular economy.

About CEAR

CEAR is a leading provider of IT Asset Disposition, Secure Data Destruction and Electronic Waste Recycling. Since 2000, our innovative technology has been designed and refined for sustainability to refurbish and recycle an average of 20 million pounds of electronics yearly. Our customizable solutions cover all aspects of electronics disposition across an extensive range of industries.
